LETTER OF INVITATION

The ITA-AITES Czech Tunnelling Association cordially invites you to **15th International Conference entitled "Underground Construction Prague 2023"**, which will be held in Prague, the capital of the Czech Republic, May 29–31, 2023.

This is the largest Czech tunnelling conference, which is held regularly every three years. Due to the pandemic, this year has been postponed by one year. Past conferences confirmed that the Prague conference thanks to its scientific programme, venue and social programme found a firm position among similar European conferences. This confirms the participation of distinguished European and international experts at each conference.

The joint conference will be held at the Clarion Congress Hotel Prague and will include a technical exhibition and a poster session.

The conference dinner will take place at the extraordinary and favorite environment of the Brevnov Monastery in Prague 6.

We are looking forward to your active participation and exchange of new information and experience.

Ivan Hrdina
Chairman CzTA ITA-AITES, z. s.

Dr. Alexandr Butovič
Chairman of the Preparatory
Committee

Prof. Matouš Hilar
Chairman of the Scientific Council

GENERAL INFORMATION ABOUT THE CONFERENCE

Conference name:	Underground Construction Prague 2023
Conference date:	May 29–31, 2023
Conference venue:	Clarion Congress Hotel Prague Freyova 33, Prague 9 – Vysočany, Czech Republic www.cchp.cz
Official languages:	English and Czech/Slovak simultaneous translation will be provided

The Clarion Congress Hotel Prague is a new modern hotel complex aimed at congresses and conferences. At the same time offers pleasant accommodation in comfortably furnished rooms, restaurant, bar and wellness center. Its advantage is an excellent transport accessibility – it is located directly at the metro station “Vysočanská” (line B), less than 15 minutes drive from the city centre. It has sufficient space in underground garages for guests arriving by car. Next to the hotel a shopping gallery Fénix can be found.

SCIENTIFIC PROGRAMME

Thematical Sessions:

1. Conventionally excavated tunnels
2. Mechanically excavated tunnels
3. Other underground structures, repositories, reconstructions and history
4. Geotechnical investigation and monitoring
5. BIM, numerical modelling, research and development
6. Equipment, operational safety and maintenance
7. Risk management, contractual relationships and funding
